

Read a Two-Way Count Table

Grades 9-12 • SAT / ACT mathematics foundations

Problem-Solving and Data Analysis • Identify the correct denominator for a conditional probability.

Original focused skill practice for learners preparing for college-entrance mathematics. Includes models, 16 practice tasks, six explain-and-check tasks, a four-item exit ticket, and worked solutions. Not a full practice exam.

PRINT • TEACH • REVISIT

Plan a focused study session

Learning objective

Identify the correct denominator for a conditional probability.

Readiness

Use after learners have studied the relevant algebra, geometry, or data concepts. Grade tags describe a typical preparation audience; readiness depends on prior coursework.

Suggested use

Session 1: 10 minutes on worked examples and 20–30 minutes on practice. Session 2: review errors, then use explain-and-check tasks. Finish with the independent exit ticket. Pause and reteach a prerequisite when the model is not yet understood.

What this resource covers

The named mathematics skill is useful within SAT and ACT preparation. The packet does not cover every exam domain, reproduce an official section, provide standardized timing, or predict a score.

Materials

Pencil, paper, and a calculator for checking when useful. Practice both symbolic reasoning and calculator verification. Follow each exam publisher's current policies for an actual test.

Student directions

Read the entire question, define quantities, show a method, and check the result. For a written explanation, cite the calculation or feature that supports your conclusion.

Two worked examples

Model 1. A survey count table has: Group A, Yes 15, No 18; Group B, Yes 28, No 12. Among respondents who answered Yes, what fraction belong to Group A?

The condition limits the denominator to Yes responses: $15 + 28 = 43$. Group A contributes 15 of those, so the fraction is $15/43$.

Model 2. A survey count table has: Group A, Yes 24, No 6; Group B, Yes 12, No 15. Among respondents who answered Yes, what fraction belong to Group A?

The condition limits the denominator to Yes responses: $24 + 12 = 36$. Group A contributes 24 of those, so the fraction is $2/3$.

Pause before looking at a solution: which relationship, definition, or constraint determines the first step?

Practice • Show a complete method

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. A survey count table has: Group A, Yes 12, No 14; Group B, Yes 28, No 11. Among respondents who answered Yes, what fraction belong to Group A?

2. A survey count table has: Group A, Yes 21, No 10; Group B, Yes 16, No 14. Among respondents who answered Yes, what fraction belong to Group A?

3. A survey count table has: Group A, Yes 18, No 16; Group B, Yes 24, No 13. Among respondents who answered Yes, what fraction belong to Group A?

Practice • Show a complete method

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

4. A survey count table has: Group A, Yes 6, No 14; Group B, Yes 28, No 9. Among respondents who answered Yes, what fraction belong to Group A?

5. A survey count table has: Group A, Yes 6, No 4; Group B, Yes 12, No 9. Among respondents who answered Yes, what fraction belong to Group A?

6. A survey count table has: Group A, Yes 21, No 18; Group B, Yes 8, No 14. Among respondents who answered Yes, what fraction belong to Group A?

Practice • Show a complete method

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

7. A survey count table has: Group A, Yes 9, No 6; Group B, Yes 8, No 10. Among respondents who answered Yes, what fraction belong to Group A?

8. A survey count table has: Group A, Yes 6, No 16; Group B, Yes 16, No 9. Among respondents who answered Yes, what fraction belong to Group A?

9. A survey count table has: Group A, Yes 21, No 6; Group B, Yes 16, No 14. Among respondents who answered Yes, what fraction belong to Group A?

Practice • Show a complete method

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

10. A survey count table has: Group A, Yes 6, No 16; Group B, Yes 12, No 9. Among respondents who answered Yes, what fraction belong to Group A?

11. A survey count table has: Group A, Yes 9, No 14; Group B, Yes 24, No 10. Among respondents who answered Yes, what fraction belong to Group A?

12. A survey count table has: Group A, Yes 18, No 10; Group B, Yes 24, No 13. Among respondents who answered Yes, what fraction belong to Group A?

Practice • Show a complete method

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

13. A survey count table has: Group A, Yes 18, No 10; Group B, Yes 12, No 13. Among respondents who answered Yes, what fraction belong to Group A?

14. A survey count table has: Group A, Yes 12, No 10; Group B, Yes 24, No 11. Among respondents who answered Yes, what fraction belong to Group A?

15. A survey count table has: Group A, Yes 18, No 14; Group B, Yes 8, No 13. Among respondents who answered Yes, what fraction belong to Group A?

Practice • Show a complete method

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

16. A survey count table has: Group A, Yes 24, No 8; Group B, Yes 20, No 15. Among respondents who answered Yes, what fraction belong to Group A?

Explain and check • Transfer practice

Solve the task, then explain a check or limitation. Compare your reasoning with the worked key only after making your own attempt.

1. A survey count table has: Group A, Yes 9, No 12; Group B, Yes 28, No 10. Among respondents who answered Yes, what fraction belong to Group A?

2. A survey count table has: Group A, Yes 18, No 6; Group B, Yes 24, No 13. Among respondents who answered Yes, what fraction belong to Group A?

Explain and check • Transfer practice

Solve the task, then explain a check or limitation. Compare your reasoning with the worked key only after making your own attempt.

3. A survey count table has: Group A, Yes 15, No 8; Group B, Yes 24, No 12. Among respondents who answered Yes, what fraction belong to Group A?

4. A survey count table has: Group A, Yes 18, No 18; Group B, Yes 20, No 13. Among respondents who answered Yes, what fraction belong to Group A?

Explain and check • Transfer practice

Solve the task, then explain a check or limitation. Compare your reasoning with the worked key only after making your own attempt.

5. A survey count table has: Group A, Yes 18, No 18; Group B, Yes 32, No 13. Among respondents who answered Yes, what fraction belong to Group A?

6. A survey count table has: Group A, Yes 18, No 12; Group B, Yes 16, No 13. Among respondents who answered Yes, what fraction belong to Group A?

Exit ticket • Independent check

Complete independently. Show reasoning and any relevant restriction. This is a classroom learning check, not a standardized test score.

1. A survey count table has: Group A, Yes 6, No 14; Group B, Yes 24, No 9. Among respondents who answered Yes, what fraction belong to Group A?

2. A survey count table has: Group A, Yes 18, No 8; Group B, Yes 24, No 13. Among respondents who answered Yes, what fraction belong to Group A?

Exit ticket • Independent check

Complete independently. Show reasoning and any relevant restriction. This is a classroom learning check, not a standardized test score.

3. A survey count table has: Group A, Yes 27, No 16; Group B, Yes 24, No 16. Among respondents who answered Yes, what fraction belong to Group A?

4. A survey count table has: Group A, Yes 15, No 16; Group B, Yes 12, No 12. Among respondents who answered Yes, what fraction belong to Group A?

Practice worked solutions

1. 3/10

The condition limits the denominator to Yes responses: $12+28 = 40$. Group A contributes 12 of those, so the fraction is 3/10.

2. 21/37

The condition limits the denominator to Yes responses: $21+16 = 37$. Group A contributes 21 of those, so the fraction is 21/37.

3. 3/7

The condition limits the denominator to Yes responses: $18+24 = 42$. Group A contributes 18 of those, so the fraction is 3/7.

4. 3/17

The condition limits the denominator to Yes responses: $6+28 = 34$. Group A contributes 6 of those, so the fraction is 3/17.

Practice worked solutions

5. 1/3

The condition limits the denominator to Yes responses: $6+12 = 18$. Group A contributes 6 of those, so the fraction is $1/3$.

6. 21/29

The condition limits the denominator to Yes responses: $21+8 = 29$. Group A contributes 21 of those, so the fraction is $21/29$.

7. 9/17

The condition limits the denominator to Yes responses: $9+8 = 17$. Group A contributes 9 of those, so the fraction is $9/17$.

8. 3/11

The condition limits the denominator to Yes responses: $6+16 = 22$. Group A contributes 6 of those, so the fraction is $3/11$.

Practice worked solutions

9. 21/37

The condition limits the denominator to Yes responses: $21+16 = 37$. Group A contributes 21 of those, so the fraction is 21/37.

10. 1/3

The condition limits the denominator to Yes responses: $6+12 = 18$. Group A contributes 6 of those, so the fraction is 1/3.

11. 3/11

The condition limits the denominator to Yes responses: $9+24 = 33$. Group A contributes 9 of those, so the fraction is 3/11.

12. 3/7

The condition limits the denominator to Yes responses: $18+24 = 42$. Group A contributes 18 of those, so the fraction is 3/7.

Practice worked solutions

13. $\frac{3}{5}$

The condition limits the denominator to Yes responses: $18+12 = 30$. Group A contributes 18 of those, so the fraction is $\frac{3}{5}$.

14. $\frac{1}{3}$

The condition limits the denominator to Yes responses: $12+24 = 36$. Group A contributes 12 of those, so the fraction is $\frac{1}{3}$.

15. $\frac{9}{13}$

The condition limits the denominator to Yes responses: $18+8 = 26$. Group A contributes 18 of those, so the fraction is $\frac{9}{13}$.

16. $\frac{6}{11}$

The condition limits the denominator to Yes responses: $24+20 = 44$. Group A contributes 24 of those, so the fraction is $\frac{6}{11}$.

Transfer worked solutions

1. 9/37

The condition limits the denominator to Yes responses: $9+28 = 37$. Group A contributes 9 of those, so the fraction is $9/37$.

2. 3/7

The condition limits the denominator to Yes responses: $18+24 = 42$. Group A contributes 18 of those, so the fraction is $3/7$.

3. 5/13

The condition limits the denominator to Yes responses: $15+24 = 39$. Group A contributes 15 of those, so the fraction is $5/13$.

4. 9/19

The condition limits the denominator to Yes responses: $18+20 = 38$. Group A contributes 18 of those, so the fraction is $9/19$.

Transfer worked solutions

5. 9/25

The condition limits the denominator to Yes responses: $18+32 = 50$. Group A contributes 18 of those, so the fraction is 9/25.

6. 9/17

The condition limits the denominator to Yes responses: $18+16 = 34$. Group A contributes 18 of those, so the fraction is 9/17.

Exit-ticket worked solutions

1. $\frac{1}{5}$

The condition limits the denominator to Yes responses: $6+24 = 30$. Group A contributes 6 of those, so the fraction is $\frac{1}{5}$.

2. $\frac{3}{7}$

The condition limits the denominator to Yes responses: $18+24 = 42$. Group A contributes 18 of those, so the fraction is $\frac{3}{7}$.

3. $\frac{9}{17}$

The condition limits the denominator to Yes responses: $27+24 = 51$. Group A contributes 27 of those, so the fraction is $\frac{9}{17}$.

4. $\frac{5}{9}$

The condition limits the denominator to Yes responses: $15+12 = 27$. Group A contributes 15 of those, so the fraction is $\frac{5}{9}$.

Use errors to choose the next step

Identify the first mismatch

Compare the student's representation with the quantities or stated condition. Separate reading the situation, choosing a method, calculation, and interpretation.

Respond precisely

If the model is wrong, use a simpler example before repeating the procedure. If the method is sound and arithmetic is wrong, correct that step and verify the original result.

Review the exit ticket

For each item: 2 points for an accurate result with coherent reasoning; 1 for a sound method with a minor error or an unexplained correct answer; 0 for unsupported or missing reasoning. Use comments to select a next action. These are local instructional criteria.

AIG

Compare two methods, construct a counterexample, or create a new problem with a prescribed solution and justify its restrictions.

504 / EC

Follow the individual plan. Offer manageable item groups, documented time or format supports, a worked step, or an alternate response method while retaining the mathematical objective.

ESL

Preview terms and symbols in the questions. Use home-language rehearsal or a bilingual glossary, then ask for a concise explanation such as "The condition means ___, so I used ___."

Sources, preparation, and license

Objective: Identify the correct denominator for a conditional probability. State alignment: not claimed. This is a focused college-entrance preparation resource, not a state course or a claim of course equivalency.
