

Tile It, Split It, Find the Area Teaching Bundle

Grade 3 • North Carolina • Mathematics

NC.3.MD.7 • Connect tiled rectangles with multiplication.

A focused classroom collection: task cards, five warm-ups, classwork, an exit ticket, four seasonal practice sets, substitute lessons, and planning pages. Each section has worked answers.

PRINT • TEACH • REVISIT

Your teaching route

Focus

Connect tiled rectangles with multiplication. This bundle practices a focused part of NC.3.MD.7; it is not a complete grade curriculum or a simulated EOG.

Before teaching

Learners should explain a simpler example using a model. Read the two worked examples, then use the first task card to check readiness.

Suggested sequence

Day 1: model for 10 minutes, then guided task cards for 15 minutes. Day 2: a 5-minute warm-up and 20 minutes of practice. Use the exit ticket to choose a small-group reteaching focus. Seasonal sets revisit the same skill using different quantities.

Materials

Pencils, blank paper, and graph paper or counters as useful. No paid app or internet is needed for student work. A calculator may check finished calculations; these are instructional choices, not official testing accommodation rules.

Make the reasoning visible

Draw equal rows of unit squares. Multiply row count by squares in each row. Split a rectangle to check by addition.

Example 1: A rectangular display for the science club measures 9 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

$9 \times 5 = 45$. One split gives $(8 \times 5) + (1 \times 5) = 40 + 5 = 45$.

Example 2: A rectangular display for the reading group measures 4 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

$4 \times 8 = 32$. One split gives $(3 \times 8) + (1 \times 8) = 24 + 8 = 32$.

Ask: What does each number represent? How could a model or inverse operation check the result?

Task cards 1–4

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 01

A rectangular display for the library team measures 7 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 02

A rectangular display for the design team measures 2 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 03

A rectangular display for the community center measures 2 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 04

A rectangular display for the school garden measures 2 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

Task cards 5–8

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 05

A rectangular display for the school garden measures 8 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 06

A rectangular display for the library team measures 8 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 07

A rectangular display for the science club measures 7 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 08

A rectangular display for the design team measures 6 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

Task cards 9–12

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 09

A rectangular display for the music club measures 5 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 10

A rectangular display for the library team measures 4 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 11

A rectangular display for the library team measures 5 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 12

A rectangular display for the design team measures 6 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

Task cards 13–16

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 13

A rectangular display for the library team measures 7 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 14

A rectangular display for the library team measures 5 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 15

A rectangular display for the music club measures 4 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

CARD 16

A rectangular display for the school garden measures 9 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

Explain your method.

Task-card response record

Use this page for final answers; attach drawings or full worked solutions on separate paper.

16. _____

Warm-up • Day 1

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

1. A rectangular display for the science club measures 9 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

-
2. A rectangular display for the library team measures 9 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

Warm-up • Day 2

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

3. A rectangular display for the art club measures 3 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the music club measures 6 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

Warm-up • Day 3

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

5. A rectangular display for the school garden measures 8 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

6. A rectangular display for the reading group measures 4 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Warm-up • Day 4

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

7. A rectangular display for the school garden measures 9 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

8. A rectangular display for the science club measures 4 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

Warm-up • Day 5

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

9. A rectangular display for the music club measures 6 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

10. A rectangular display for the library team measures 7 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

Classwork • Represent and explain

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. A rectangular display for the library team measures 6 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the reading group measures 5 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the science club measures 6 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

Classwork • Represent and explain

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

4. A rectangular display for the community center measures 2 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

5. A rectangular display for the design team measures 8 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

6. A rectangular display for the design team measures 3 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

Exit ticket • Try independently

Complete the four questions independently. Show enough reasoning for your teacher to see your method. This is a classroom check, not a standardized score.

1. A rectangular display for the design team measures 3 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the science club measures 3 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the music club measures 5 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the music club measures 4 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

Task-card worked solutions

1. 14 square units

$7 \times 2 = 14$. One split gives $(6 \times 2) + (1 \times 2) = 12 + 2 = 14$.

2. 4 square units

$2 \times 2 = 4$. One split gives $(1 \times 2) + (1 \times 2) = 2 + 2 = 4$.

3. 12 square units

$2 \times 6 = 12$. One split gives $(1 \times 6) + (1 \times 6) = 6 + 6 = 12$.

4. 4 square units

$2 \times 2 = 4$. One split gives $(1 \times 2) + (1 \times 2) = 2 + 2 = 4$.

5. 32 square units

$8 \times 4 = 32$. One split gives $(7 \times 4) + (1 \times 4) = 28 + 4 = 32$.

6. 32 square units

$8 \times 4 = 32$. One split gives $(7 \times 4) + (1 \times 4) = 28 + 4 = 32$.

Task-card worked solutions

7. 21 square units

$7 \times 3 = 21$. One split gives $(6 \times 3) + (1 \times 3) = 18 + 3 = 21$.

8. 12 square units

$6 \times 2 = 12$. One split gives $(5 \times 2) + (1 \times 2) = 10 + 2 = 12$.

9. 40 square units

$5 \times 8 = 40$. One split gives $(4 \times 8) + (1 \times 8) = 32 + 8 = 40$.

10. 8 square units

$4 \times 2 = 8$. One split gives $(3 \times 2) + (1 \times 2) = 6 + 2 = 8$.

11. 10 square units

$5 \times 2 = 10$. One split gives $(4 \times 2) + (1 \times 2) = 8 + 2 = 10$.

12. 12 square units

$6 \times 2 = 12$. One split gives $(5 \times 2) + (1 \times 2) = 10 + 2 = 12$.

Task-card worked solutions

13. 42 square units

$7 \times 6 = 42$. One split gives $(6 \times 6) + (1 \times 6) = 36 + 6 = 42$.

14. 15 square units

$5 \times 3 = 15$. One split gives $(4 \times 3) + (1 \times 3) = 12 + 3 = 15$.

15. 20 square units

$4 \times 5 = 20$. One split gives $(3 \times 5) + (1 \times 5) = 15 + 5 = 20$.

16. 27 square units

$9 \times 3 = 27$. One split gives $(8 \times 3) + (1 \times 3) = 24 + 3 = 27$.

Warm-up worked solutions

1. 27 square units

$9 \times 3 = 27$. One split gives $(8 \times 3) + (1 \times 3) = 24 + 3 = 27$.

2. 72 square units

$9 \times 8 = 72$. One split gives $(8 \times 8) + (1 \times 8) = 64 + 8 = 72$.

3. 9 square units

$3 \times 3 = 9$. One split gives $(2 \times 3) + (1 \times 3) = 6 + 3 = 9$.

4. 42 square units

$6 \times 7 = 42$. One split gives $(5 \times 7) + (1 \times 7) = 35 + 7 = 42$.

5. 56 square units

$8 \times 7 = 56$. One split gives $(7 \times 7) + (1 \times 7) = 49 + 7 = 56$.

6. 8 square units

$4 \times 2 = 8$. One split gives $(3 \times 2) + (1 \times 2) = 6 + 2 = 8$.

Warm-up worked solutions

7. 63 square units

$9 \times 7 = 63$. One split gives $(8 \times 7) + (1 \times 7) = 56 + 7 = 63$.

8. 32 square units

$4 \times 8 = 32$. One split gives $(3 \times 8) + (1 \times 8) = 24 + 8 = 32$.

9. 36 square units

$6 \times 6 = 36$. One split gives $(5 \times 6) + (1 \times 6) = 30 + 6 = 36$.

10. 56 square units

$7 \times 8 = 56$. One split gives $(6 \times 8) + (1 \times 8) = 48 + 8 = 56$.

Classwork worked solutions

1. 48 square units

$6 \times 8 = 48$. One split gives $(5 \times 8) + (1 \times 8) = 40 + 8 = 48$.

2. 20 square units

$5 \times 4 = 20$. One split gives $(4 \times 4) + (1 \times 4) = 16 + 4 = 20$.

3. 42 square units

$6 \times 7 = 42$. One split gives $(5 \times 7) + (1 \times 7) = 35 + 7 = 42$.

4. 10 square units

$2 \times 5 = 10$. One split gives $(1 \times 5) + (1 \times 5) = 5 + 5 = 10$.

5. 32 square units

$8 \times 4 = 32$. One split gives $(7 \times 4) + (1 \times 4) = 28 + 4 = 32$.

6. 18 square units

$3 \times 6 = 18$. One split gives $(2 \times 6) + (1 \times 6) = 12 + 6 = 18$.

Exit-ticket worked solutions

1. 9 square units

$3 \times 3 = 9$. One split gives $(2 \times 3) + (1 \times 3) = 6 + 3 = 9$.

2. 9 square units

$3 \times 3 = 9$. One split gives $(2 \times 3) + (1 \times 3) = 6 + 3 = 9$.

3. 15 square units

$5 \times 3 = 15$. One split gives $(4 \times 3) + (1 \times 3) = 12 + 3 = 15$.

4. 12 square units

$4 \times 3 = 12$. One split gives $(3 \times 3) + (1 \times 3) = 9 + 3 = 12$.

Fall • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A rectangular display for the autumn reading fair measures 5 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the fall garden club measures 7 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the autumn reading fair measures 7 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the leaf observation team measures 5 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

Fall • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A rectangular display for the autumn reading fair measures 6 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

6. A rectangular display for the October book drive measures 8 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

7. A rectangular display for the October book drive measures 9 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

8. A rectangular display for the October book drive measures 9 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

Fall • Worked solutions

1. 20 square units

$5 \times 4 = 20$. One split gives $(4 \times 4) + (1 \times 4) = 16 + 4 = 20$.

2. 56 square units

$7 \times 8 = 56$. One split gives $(6 \times 8) + (1 \times 8) = 48 + 8 = 56$.

3. 49 square units

$7 \times 7 = 49$. One split gives $(6 \times 7) + (1 \times 7) = 42 + 7 = 49$.

4. 15 square units

$5 \times 3 = 15$. One split gives $(4 \times 3) + (1 \times 3) = 12 + 3 = 15$.

Fall • Worked solutions

5. 42 square units

$6 \times 7 = 42$. One split gives $(5 \times 7) + (1 \times 7) = 35 + 7 = 42$.

6. 40 square units

$8 \times 5 = 40$. One split gives $(7 \times 5) + (1 \times 5) = 35 + 5 = 40$.

7. 27 square units

$9 \times 3 = 27$. One split gives $(8 \times 3) + (1 \times 3) = 24 + 3 = 27$.

8. 54 square units

$9 \times 6 = 54$. One split gives $(8 \times 6) + (1 \times 6) = 48 + 6 = 54$.

Winter • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A rectangular display for the indoor garden project measures 6 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the winter supply drive measures 3 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the January puzzle club measures 5 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the winter supply drive measures 8 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

Winter • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A rectangular display for the winter reading club measures 5 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

6. A rectangular display for the January puzzle club measures 3 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

7. A rectangular display for the January puzzle club measures 9 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

8. A rectangular display for the indoor garden project measures 4 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

Winter • Worked solutions

1. 48 square units

$6 \times 8 = 48$. One split gives $(5 \times 8) + (1 \times 8) = 40 + 8 = 48$.

2. 9 square units

$3 \times 3 = 9$. One split gives $(2 \times 3) + (1 \times 3) = 6 + 3 = 9$.

3. 25 square units

$5 \times 5 = 25$. One split gives $(4 \times 5) + (1 \times 5) = 20 + 5 = 25$.

4. 48 square units

$8 \times 6 = 48$. One split gives $(7 \times 6) + (1 \times 6) = 42 + 6 = 48$.

Winter • Worked solutions

5. 35 square units

$5 \times 7 = 35$. One split gives $(4 \times 7) + (1 \times 7) = 28 + 7 = 35$.

6. 15 square units

$3 \times 5 = 15$. One split gives $(2 \times 5) + (1 \times 5) = 10 + 5 = 15$.

7. 63 square units

$9 \times 7 = 63$. One split gives $(8 \times 7) + (1 \times 7) = 56 + 7 = 63$.

8. 28 square units

$4 \times 7 = 28$. One split gives $(3 \times 7) + (1 \times 7) = 21 + 7 = 28$.

Spring break • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A rectangular display for the seedling club measures 7 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the April science team measures 6 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the seedling club measures 2 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the seedling club measures 2 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

Spring break • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A rectangular display for the spring book swap measures 9 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

6. A rectangular display for the spring book swap measures 4 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

7. A rectangular display for the spring book swap measures 2 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

8. A rectangular display for the April science team measures 7 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

Spring break • Worked solutions

1. 42 square units

$7 \times 6 = 42$. One split gives $(6 \times 6) + (1 \times 6) = 36 + 6 = 42$.

2. 18 square units

$6 \times 3 = 18$. One split gives $(5 \times 3) + (1 \times 3) = 15 + 3 = 18$.

3. 14 square units

$2 \times 7 = 14$. One split gives $(1 \times 7) + (1 \times 7) = 7 + 7 = 14$.

4. 16 square units

$2 \times 8 = 16$. One split gives $(1 \times 8) + (1 \times 8) = 8 + 8 = 16$.

Spring break • Worked solutions

5. 63 square units

$9 \times 7 = 63$. One split gives $(8 \times 7) + (1 \times 7) = 56 + 7 = 63$.

6. 16 square units

$4 \times 4 = 16$. One split gives $(3 \times 4) + (1 \times 4) = 12 + 4 = 16$.

7. 16 square units

$2 \times 8 = 16$. One split gives $(1 \times 8) + (1 \times 8) = 8 + 8 = 16$.

8. 56 square units

$7 \times 8 = 56$. One split gives $(6 \times 8) + (1 \times 8) = 48 + 8 = 56$.

Summer • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A rectangular display for the June art workshop measures 4 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the June art workshop measures 7 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the summer supply team measures 9 units by 8 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the community garden measures 2 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

Summer • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A rectangular display for the community garden measures 8 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

6. A rectangular display for the summer supply team measures 8 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

7. A rectangular display for the June art workshop measures 5 units by 3 units. Draw unit-square rows, find the area, and show a split-and-add check.

8. A rectangular display for the June art workshop measures 6 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

Summer • Worked solutions

1. 32 square units

$4 \times 8 = 32$. One split gives $(3 \times 8) + (1 \times 8) = 24 + 8 = 32$.

2. 14 square units

$7 \times 2 = 14$. One split gives $(6 \times 2) + (1 \times 2) = 12 + 2 = 14$.

3. 72 square units

$9 \times 8 = 72$. One split gives $(8 \times 8) + (1 \times 8) = 64 + 8 = 72$.

4. 8 square units

$2 \times 4 = 8$. One split gives $(1 \times 4) + (1 \times 4) = 4 + 4 = 8$.

Summer • Worked solutions

5. 48 square units

$8 \times 6 = 48$. One split gives $(7 \times 6) + (1 \times 6) = 42 + 6 = 48$.

6. 24 square units

$8 \times 3 = 24$. One split gives $(7 \times 3) + (1 \times 3) = 21 + 3 = 24$.

7. 15 square units

$5 \times 3 = 15$. One split gives $(4 \times 3) + (1 \times 3) = 12 + 3 = 15$.

8. 42 square units

$6 \times 7 = 42$. One split gives $(5 \times 7) + (1 \times 7) = 35 + 7 = 42$.

Substitute lesson

Before students arrive

Locate the class schedule, seating plan, emergency procedures, and approved learner supports from the school. This academic packet does not replace those school-specific instructions.

0-5 minutes: settle

Read the goal aloud: Connect tiled rectangles with multiplication. Let students explain a familiar strategy to a partner.

5-15 minutes: model

Use the worked-example page. Draw equal rows of unit squares. Multiply row count by squares in each row. Split a rectangle to check by addition.

15-30 minutes: practice

Distribute the next practice page. Students solve independently first, then compare one explanation in pairs. If copying is unavailable, read one question at a time and allow drawings or oral responses.

30-40 minutes: discuss

Use the following key. Ask students to locate the first step where methods diverged; invite a correction supported by a model.

40-45 minutes: handover

Collect one explanation from each student. On the planning page, record which step needs reteaching, who requested help, and what was completed. Use neutral observations, not diagnostic labels.

Substitute lesson • Practice

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. A rectangular display for the school art team measures 3 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the student design group measures 8 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the school art team measures 4 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the library helpers measures 3 units by 6 units. Draw unit-square rows, find the area, and show a split-and-add check.

Substitute lesson • Worked solutions

1. 15 square units

$3 \times 5 = 15$. One split gives $(2 \times 5) + (1 \times 5) = 10 + 5 = 15$.

2. 16 square units

$8 \times 2 = 16$. One split gives $(7 \times 2) + (1 \times 2) = 14 + 2 = 16$.

3. 16 square units

$4 \times 4 = 16$. One split gives $(3 \times 4) + (1 \times 4) = 12 + 4 = 16$.

4. 18 square units

$3 \times 6 = 18$. One split gives $(2 \times 6) + (1 \times 6) = 12 + 6 = 18$.

Emergency substitute lesson

Before students arrive

Locate the class schedule, seating plan, emergency procedures, and approved learner supports from the school. This academic packet does not replace those school-specific instructions.

0-5 minutes: settle

Read the goal aloud: Connect tiled rectangles with multiplication. Let students explain a familiar strategy to a partner.

5-15 minutes: model

No copies or devices? Write the first worked example on the board; students use blank paper. Draw equal rows of unit squares. Multiply row count by squares in each row. Split a rectangle to check by addition.

15-30 minutes: practice

Distribute the next practice page. Students solve independently first, then compare one explanation in pairs. If copying is unavailable, read one question at a time and allow drawings or oral responses.

30-40 minutes: discuss

Use the following key. Ask students to locate the first step where methods diverged; invite a correction supported by a model.

40-45 minutes: handover

Collect one explanation from each student. On the planning page, record which step needs reteaching, who requested help, and what was completed. Use neutral observations, not diagnostic labels.

Emergency substitute lesson • Practice

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. A rectangular display for the classroom book group measures 3 units by 5 units. Draw unit-square rows, find the area, and show a split-and-add check.

2. A rectangular display for the paper puzzle team measures 8 units by 4 units. Draw unit-square rows, find the area, and show a split-and-add check.

3. A rectangular display for the classroom book group measures 8 units by 7 units. Draw unit-square rows, find the area, and show a split-and-add check.

4. A rectangular display for the quiet design team measures 3 units by 2 units. Draw unit-square rows, find the area, and show a split-and-add check.

Emergency substitute lesson • Worked solutions

1. 15 square units

$3 \times 5 = 15$. One split gives $(2 \times 5) + (1 \times 5) = 10 + 5 = 15$.

2. 32 square units

$8 \times 4 = 32$. One split gives $(7 \times 4) + (1 \times 4) = 28 + 4 = 32$.

3. 56 square units

$8 \times 7 = 56$. One split gives $(7 \times 7) + (1 \times 7) = 49 + 7 = 56$.

4. 6 square units

$3 \times 2 = 6$. One split gives $(2 \times 2) + (1 \times 2) = 4 + 2 = 6$.

A completed lesson-plan example

Level and focus

Grade 3; NC.3.MD.7; Connect tiled rectangles with multiplication.

Evidence of learning

Student represents the quantities, selects a valid method, calculates accurately, and explains the result with appropriate units.

Launch / model

Use worked example 1. Ask students to annotate the role of every quantity. Demonstrate the model before moving to symbols.

Guided / independent practice

Use cards 1-4 in pairs; assign classwork independently. Change grouping according to the explanation you hear rather than speed alone.

Formative check

Use the four-question exit ticket. Score each item 0-2: 2 for an accurate result with coherent reasoning, 1 for a sound method with a minor error or an unexplained correct result, 0 for missing or unsupported reasoning.

Next teaching decision

0-3 points: reteach with a concrete model. 4-6: correct the specific misconception with a short example. 7-8: invite a second representation or a student-created problem. These are local instructional decisions, not mastery cutoffs validated by a test publisher.

Plan your next lesson

Date, class, and focus / exact local standard:

What will students do to show understanding?

Launch and worked example:

Guided practice and independent task:

Access supports and extension:

Exit evidence and next lesson decision:

Access, sources, and classroom license

AIG: Invite two methods, a counterexample, or a new task with a specified solution. Ask students to explain limits of a shortcut.

504: Apply the student's plan: breaks, extra time, enlarged print, reduced copying, or alternate response methods as documented.

EC: Use the IEP to select supports. Model one step, offer counters or a diagram, reduce the visible item set, and accept an oral explanation when appropriate.

ESL: Preview quantity, difference, factor, or other relevant terms. Let students rehearse in a home language, then use "I chose ___ because ___." Maintain the mathematical goal.
