

Division with Meaningful Remainders

Grade 4 • Mathematics
NC.4.NBT.6

Explain whole-number division and remainders.

What will a strong explanation show?

1. A model or equation that fits the quantities.
2. Accurate calculation with appropriate units.
3. A check that makes the answer reasonable.

Watch the reasoning

79 counters are shared equally among 2 groups. Each group must get a whole number. How many per group and how many left? Show a partial-quotient strategy.

$79 = 2 \times 39 + 1$; 1 is smaller than 2. Use 30 groups, then 9 more.

Build a second model together

137 counters are shared equally among 2 groups. Each group must get a whole number. How many per group and how many left? Show a partial-quotient strategy.

Discuss: What should the first step find?

Your turn • 1

199 counters are shared equally among 3 groups. Each group must get a whole number. How many per group and how many left?
Show a partial-quotient strategy.

Represent → solve → explain → check

Your turn • 2

368 counters are shared equally among 6 groups. Each group must get a whole number. How many per group and how many left?
Show a partial-quotient strategy.

Represent → solve → explain → check

Your turn • 3

279 counters are shared equally among 4 groups. Each group must get a whole number. How many per group and how many left?
Show a partial-quotient strategy.

Represent → solve → explain → check

Your turn • 4

633 counters are shared equally among 8 groups. Each group must get a whole number. How many per group and how many left?
Show a partial-quotient strategy.

Represent → solve → explain → check

Exit question • Explain independently

158 counters are shared equally among 3 groups. Each group must get a whole number. How many per group and how many left? Show a partial-quotient strategy.

Include a check. What would you teach someone else?

Teacher review and next steps

1. 66 each; 1 left

2. 61 each; 2 left

3. 69 each; 3 left

4. 79 each; 1 left

Exit: 52 each; 2 left

Use the worked PDF key and slide notes to discuss methods. Revisit the earliest unclear step before adding more practice.
