

Join and Separate Fraction Parts

Grade 4 • Mathematics
NC.4.NF.3

Add and subtract like-denominator fractions.

What will a strong explanation show?

1. A model or equation that fits the quantities.
2. Accurate calculation with appropriate units.
3. A check that makes the answer reasonable.

Watch the reasoning

Find $4/8 - 4/8$. Use equal-sized parts of the same whole and draw a fraction model.

$4/8 - 4/8 = 0/8 = 0$. Only the number of parts changes; the size stays $1/8$.

Build a second model together

Find $5/12 + 6/12$. Use equal-sized parts of the same whole and draw a fraction model.

Discuss: What should the first step find?

Your turn • 1

Find $7/10 - 2/10$. Use equal-sized parts of the same whole and draw a fraction model.

Represent → solve → explain → check

Your turn • 2

Find $\frac{4}{6} + \frac{1}{6}$. Use equal-sized parts of the same whole and draw a fraction model.

Represent → solve → explain → check

Your turn • 3

Find $\frac{4}{5} - \frac{2}{5}$. Use equal-sized parts of the same whole and draw a fraction model.

Represent → solve → explain → check

Your turn • 4

Find $\frac{3}{4} + \frac{1}{4}$. Use equal-sized parts of the same whole and draw a fraction model.

Represent → solve → explain → check

Exit question • Explain independently

Find $2/5 - 2/5$. Use equal-sized parts of the same whole and draw a fraction model.

Include a check. What would you teach someone else?

Teacher review and next steps

1. 1/2

Exit: 0

2. 5/6

Use the worked PDF key and slide notes to discuss methods. Revisit the earliest unclear step before adding more practice.

3. 2/5

4. 1
