

Regrouping with Large Numbers

Grade 4 • Mathematics
NC.4.NBT.4

Explain multi-digit addition and subtraction.

What will a strong explanation show?

1. A model or equation that fits the quantities.
2. Accurate calculation with appropriate units.
3. A check that makes the answer reasonable.

Watch the reasoning

Find $39,768 + 41,652$. Show a place-value method and a different check.

Combine equal place values and regroup: $39,768 + 41,652 = 81,420$. Check by subtracting 39,768.

Build a second model together

Find $56,377 - 39,830$. Show a place-value method and a different check.

Discuss: What should the first step find?

Your turn • 1

Find $20,589 + 30,769$. Show a place-value method and a different check.

Represent → solve → explain → check

Your turn • 2

Find $54,310 - 29,578$. Show a place-value method and a different check.

Represent → solve → explain → check

Your turn • 3

Find $37,663 + 18,090$. Show a place-value method and a different check.

Represent → solve → explain → check

Your turn • 4

Find $56,897 - 36,384$. Show a place-value method and a different check.

Represent → solve → explain → check

Exit question • Explain independently

Find $43,840 + 21,535$. Show a place-value method and a different check.

Include a check. What would you teach someone else?

Teacher review and next steps

1. 51,358

Exit: 65,375

2. 24,732

Use the worked PDF key and slide notes to discuss methods. Revisit the earliest unclear step before adding more practice.

3. 55,753

4. 20,513
