

Decimal Decisions at the Supply Desk

Grade 5 • Mathematics
NC.5.NBT.7

Use decimal place value in contextual operations.

What will a strong explanation show?

1. A model or equation that fits the quantities.
2. Accurate calculation with appropriate units.
3. A check that makes the answer reasonable.

Watch the reasoning

The science club buys supplies costing \$4.25 and \$7.28. It pays \$14.00. Find the change and show a decimal-place check.

Total: $\$4.25 + \$7.28 = \$11.53$. Change: $\$14.00 - \$11.53 = \$2.47$.

Build a second model together

The library team buys supplies costing \$3.14 and \$6.52. It pays \$12.00. Find the change and show a decimal-place check.

Discuss: What should the first step find?

Your turn • 1

The music club buys supplies costing \$2.87 and \$1.78. It pays \$7.00. Find the change and show a decimal-place check.

Represent → solve → explain → check

Your turn • 2

The music club buys supplies costing \$5.42 and \$8.29. It pays \$16.00. Find the change and show a decimal-place check.

Represent → solve → explain → check

Your turn • 3

The music club buys supplies costing \$2.45 and \$8.59. It pays \$14.00. Find the change and show a decimal-place check.

Represent → solve → explain → check

Your turn • 4

The art club buys supplies costing \$3.97 and \$7.27. It pays \$14.00. Find the change and show a decimal-place check.

Represent → solve → explain → check

Exit question • Explain independently

The reading group buys supplies costing \$6.01 and \$6.14. It pays \$15.00. Find the change and show a decimal-place check.

Include a check. What would you teach someone else?

Teacher review and next steps

1. \$2.35

2. \$2.29

3. \$2.96

4. \$2.76

Exit: \$2.85

Use the worked PDF key and slide notes to discuss methods. Revisit the earliest unclear step before adding more practice.
