Your teaching route

Focus

Use decimal place value in contextual operations. This bundle practices a focused part of NC.5.NBT.7; it is not a complete grade curriculum or a simulated EOG.

Before teaching

Learners should explain a simpler example using a model. Read the two worked examples, then use the first task card to check readiness.

Suggested sequence

Day 1: model for 10 minutes, then guided task cards for 15 minutes. Day 2: a 5-minute warm-up and 20 minutes of practice. Use the exit ticket to choose a small-group reteaching focus. Seasonal sets revisit the same skill using different quantities.

Materials

Pencils, blank paper, and graph paper or counters as useful. No paid app or internet is needed for student work. A calculator may check finished calculations; these are instructional choices, not official testing accommodation rules.

Make the reasoning visible

Align decimal places when combining amounts. Estimate with whole dollars, then check the exact cents.

Example 1: The science club buys supplies costing \$4.25 and \$7.28. It pays \$14.00. Find the change and show a decimal-place check.

Total: $\$4.25 + \$7.28 = \$11.53$. Change: $\$14.00 - \$11.53 = \$2.47$.

Example 2: The library team buys supplies costing \$3.14 and \$6.52. It pays \$12.00. Find the change and show a decimal-place check.

Total: $\$3.14 + \$6.52 = \$9.66$. Change: $\$12.00 - \$9.66 = \$2.34$.

Ask: What does each number represent? How could a model or inverse operation check the result?

Total: $\$4.28 + \$5.01 = \$9.29$. Change: $\$12.00 - \$9.29 = \$2.71$.

Substitute lesson

Before students arrive

Locate the class schedule, seating plan, emergency procedures, and approved learner supports from the school. This academic packet does not replace those school-specific instructions.

0-5 minutes: settle

Read the goal aloud: Use decimal place value in contextual operations. Let students explain a familiar strategy to a partner.

5-15 minutes: model

Use the worked-example page. Align decimal places when combining amounts. Estimate with whole dollars, then check the exact cents.

15-30 minutes: practice

Distribute the next practice page. Students solve independently first, then compare one explanation in pairs. If copying is unavailable, read one question at a time and allow drawings or oral responses.

30-40 minutes: discuss

Use the following key. Ask students to locate the first step where methods diverged; invite a correction supported by a model.

40-45 minutes: handover

Collect one explanation from each student. On the planning page, record which step needs reteaching, who requested help, and what was completed. Use neutral observations, not diagnostic labels.

Substitute lesson • Practice

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. The library helpers buys supplies costing \$4.02 and \$9.58. It pays \$16.00. Find the change and show a decimal-place check.

2. The student design group buys supplies costing \$7.05 and \$2.73. It pays \$12.00. Find the change and show a decimal-place check.

3. The school art team buys supplies costing \$6.05 and \$6.00. It pays \$15.00. Find the change and show a decimal-place check.

4. The classroom supply team buys supplies costing \$1.39 and \$3.50. It pays \$7.00. Find the change and show a decimal-place check.

Substitute lesson • Worked solutions

1. \$2.40

Total: $\$4.02 + \$9.58 = \$13.60$. Change: $\$16.00 - \$13.60 = \$2.40$.

2. \$2.22

Total: $\$7.05 + \$2.73 = \$9.78$. Change: $\$12.00 - \$9.78 = \$2.22$.

3. \$2.95

Total: $\$6.05 + \$6.00 = \$12.05$. Change: $\$15.00 - \$12.05 = \$2.95$.

4. \$2.11

Total: $\$1.39 + \$3.50 = \$4.89$. Change: $\$7.00 - \$4.89 = \$2.11$.

0-5 minutes: settle

Read the goal aloud: Use decimal place value in contextual operations. Let students explain a familiar strategy to a partner.

5-15 minutes: model

No copies or devices? Write the first worked example on the board; students use blank paper. Align decimal places when combining amounts. Estimate with whole dollars, then check the exact cents.

1. The paper puzzle team buys supplies costing \$7.89 and \$9.52. It pays \$20.00. Find the change and show a decimal-place check.

2. The quiet design team buys supplies costing \$9.17 and \$2.01. It pays \$14.00. Find the change and show a decimal-place check.

3. The classroom book group buys supplies costing \$3.52 and \$2.13. It pays \$8.00. Find the change and show a decimal-place check.

4. The classroom book group buys supplies costing \$6.40 and \$2.07. It pays \$11.00. Find the change and show a decimal-place check.

Emergency substitute lesson • Worked solutions

1. \$2.59

Total: $\$7.89 + \$9.52 = \$17.41$. Change: $\$20.00 - \$17.41 = \$2.59$.

2. \$2.82

Total: $\$9.17 + \$2.01 = \$11.18$. Change: $\$14.00 - \$11.18 = \$2.82$.

3. \$2.35

A completed lesson-plan example

Level and focus

Grade 5; NC.5.NBT.7; Use decimal place value in contextual operations.

Evidence of learning

Student represents the quantities, selects a valid method, calculates accurately, and explains the result with appropriate units.

Launch / model

Use worked example 1. Ask students to annotate the role of every quantity. Demonstrate the model before moving to symbols.

Guided / independent practice

Use cards 1-4 in pairs; assign classwork independently. Change grouping according to the explanation you hear rather than speed alone.

Formative check

Use the four-question exit ticket. Score each item 0-2: 2 for an accurate result with coherent reasoning, 1 for a sound method with a minor error or an unexplained correct result, 0 for missing or unsupported reasoning.

Next teaching decision

0-3 points: reteach with a concrete model. 4-6: correct the specific misconception with a short example. 7-8: invite a second representation or a student-created problem. These are local instructional decisions, not mastery cutoffs validated by a test publisher.

AIG: Invite two methods, a counterexample, or a new task with a specified solution. Ask students to explain limits of a shortcut.

504: Apply the student's plan: breaks, extra time, enlarged print, reduced copying, or alternate response methods as documented.

EC: Use the IEP to select supports. Model one step, offer counters or a diagram, reduce the visible item set, and accept an oral explanation when appropriate.

ESL: Preview quantity, difference, factor, or other relevant terms. Let students rehearse in a home language, then use "I chose ___ because ___." Maintain the mathematical goal.
