

Sharing Quantities Fairly

Grade 5 • Mathematics
NC.5.NF.3

Interpret division as a fraction.

What will a strong explanation show?

1. A model or equation that fits the quantities.
2. Accurate calculation with appropriate units.
3. A check that makes the answer reasonable.

Watch the reasoning

5 identical paper strips are shared equally among 7 students. How much of one strip does each student receive? Draw and label a sharing model.

$5 \div 7 = 5/7 = 5/7$. Split each strip into 7 equal parts; each student gets 5 such parts.

Build a second model together

8 identical paper strips are shared equally among 5 students. How much of one strip does each student receive? Draw and label a sharing model.

Discuss: What should the first step find?

Your turn • 1

9 identical paper strips are shared equally among 3 students. How much of one strip does each student receive? Draw and label a sharing model.

Represent → solve → explain → check

Your turn • 2

2 identical paper strips are shared equally among 4 students. How much of one strip does each student receive? Draw and label a sharing model.

Represent → solve → explain → check

Your turn • 3

4 identical paper strips are shared equally among 5 students. How much of one strip does each student receive? Draw and label a sharing model.

Represent → solve → explain → check

Your turn • 4

7 identical paper strips are shared equally among 8 students. How much of one strip does each student receive? Draw and label a sharing model.

Represent → solve → explain → check

Exit question • Explain independently

9 identical paper strips are shared equally among 2 students. How much of one strip does each student receive? Draw and label a sharing model.

Include a check. What would you teach someone else?

Teacher review and next steps

1. 3 of a strip

2. $\frac{1}{2}$ of a strip

3. $\frac{4}{5}$ of a strip

4. $\frac{7}{8}$ of a strip

Exit: $\frac{9}{2}$ of a strip

Use the worked PDF key and slide notes to discuss methods. Revisit the earliest unclear step before adding more practice.
