

Percent Benchmarks in Action Teaching Bundle

Grade 6 • North Carolina • Mathematics

NC.6.RP.4 • Find parts using percent benchmarks.

A focused classroom collection: task cards, five warm-ups, classwork, an exit ticket, four seasonal practice sets, substitute lessons, and planning pages. Each section has worked answers.

PRINT • TEACH • REVISIT

Your teaching route

Focus

Find parts using percent benchmarks. This bundle practices a focused part of NC.6.RP.4; it is not a complete grade curriculum or a simulated EOG.

Before teaching

Learners should explain a simpler example using a model. Read the two worked examples, then use the first task card to check readiness.

Suggested sequence

Day 1: model for 10 minutes, then guided task cards for 15 minutes. Day 2: a 5-minute warm-up and 20 minutes of practice. Use the exit ticket to choose a small-group reteaching focus. Seasonal sets revisit the same skill using different quantities.

Materials

Pencils, blank paper, and graph paper or counters as useful. No paid app or internet is needed for student work. A calculator may check finished calculations; these are instructional choices, not official testing accommodation rules.

Make the reasoning visible

Think of percent as parts per hundred. Build useful amounts from 10%, 25%, or 50%, then check against the whole.

Example 1: Of 60 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

$75\% = 75/100$. $60 \times 75/100 = 45$. For example, 10% of 60 is 6; combine convenient benchmark parts.

Example 2: Of 40 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

$20\% = 20/100$. $40 \times 20/100 = 8$. For example, 10% of 40 is 4; combine convenient benchmark parts.

Ask: What does each number represent? How could a model or inverse operation check the result?

Task cards 1–4

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 01

Of 80 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 02

Of 60 supplies, 50% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 03

Of 160 supplies, 50% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 04

Of 40 supplies, 30% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

Task cards 5–8

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 05

Of 40 supplies, 5% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 06

Of 80 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 07

Of 40 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 08

Of 80 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

Task cards 9–12

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 09

Of 200 supplies, 50% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 10

Of 60 supplies, 30% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 11

Of 120 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 12

Of 60 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

Task cards 13–16

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 13

Of 80 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 14

Of 40 supplies, 50% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 15

Of 120 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

CARD 16

Of 60 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Explain your method.

Task-card response record

Warm-up • Day 1

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

1. Of 200 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

2. Of 200 supplies, 5% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Warm-up • Day 2

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

3. Of 200 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

4. Of 200 supplies, 30% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Warm-up • Day 3

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

5. Of 200 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

6. Of 200 supplies, 30% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Warm-up • Day 4

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

7. Of 80 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

8. Of 160 supplies, 25% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Warm-up • Day 5

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

9. Of 80 supplies, 25% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

10. Of 160 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Classwork • Represent and explain

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. Of 60 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

2. Of 80 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

3. Of 160 supplies, 5% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Classwork • Represent and explain

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

4. Of 40 supplies, 5% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

5. Of 200 supplies, 25% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

6. Of 40 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Exit ticket • Try independently

Complete the four questions independently. Show enough reasoning for your teacher to see your method. This is a classroom check, not a standardized score.

1. Of 120 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

2. Of 80 supplies, 5% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

3. Of 60 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

4. Of 200 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Task-card worked solutions

1. 16

$20\% = 20/100$. $80 \times 20/100 = 16$. For example, 10% of 80 is 8; combine convenient benchmark parts.

2. 30

$50\% = 50/100$. $60 \times 50/100 = 30$. For example, 10% of 60 is 6; combine convenient benchmark parts.

3. 80

$50\% = 50/100$. $160 \times 50/100 = 80$. For example, 10% of 160 is 16; combine convenient benchmark parts.

4. 12

$30\% = 30/100$. $40 \times 30/100 = 12$. For example, 10% of 40 is 4; combine convenient benchmark parts.

5. 2

$5\% = 5/100$. $40 \times 5/100 = 2$. For example, 10% of 40 is 4; combine convenient benchmark parts.

6. 12

$15\% = 15/100$. $80 \times 15/100 = 12$. For example, 10% of 80 is 8; combine convenient benchmark parts.

Task-card worked solutions

7. 6

$15\% = 15/100$. $40 \times 15/100 = 6$. For example, 10% of 40 is 4; combine convenient benchmark parts.

8. 60

$75\% = 75/100$. $80 \times 75/100 = 60$. For example, 10% of 80 is 8; combine convenient benchmark parts.

9. 100

$50\% = 50/100$. $200 \times 50/100 = 100$. For example, 10% of 200 is 20; combine convenient benchmark parts.

10. 18

$30\% = 30/100$. $60 \times 30/100 = 18$. For example, 10% of 60 is 6; combine convenient benchmark parts.

11. 24

$20\% = 20/100$. $120 \times 20/100 = 24$. For example, 10% of 120 is 12; combine convenient benchmark parts.

12. 12

$20\% = 20/100$. $60 \times 20/100 = 12$. For example, 10% of 60 is 6; combine convenient benchmark parts.

Task-card worked solutions

13. 16

$20\% = 20/100$. $80 \times 20/100 = 16$. For example, 10% of 80 is 8; combine convenient benchmark parts.

14. 20

$50\% = 50/100$. $40 \times 50/100 = 20$. For example, 10% of 40 is 4; combine convenient benchmark parts.

15. 90

$75\% = 75/100$. $120 \times 75/100 = 90$. For example, 10% of 120 is 12; combine convenient benchmark parts.

16. 9

$15\% = 15/100$. $60 \times 15/100 = 9$. For example, 10% of 60 is 6; combine convenient benchmark parts.

Warm-up worked solutions

1. 30

$15\% = 15/100$. $200 \times 15/100 = 30$. For example, 10% of 200 is 20; combine convenient benchmark parts.

2. 10

$5\% = 5/100$. $200 \times 5/100 = 10$. For example, 10% of 200 is 20; combine convenient benchmark parts.

3. 30

$15\% = 15/100$. $200 \times 15/100 = 30$. For example, 10% of 200 is 20; combine convenient benchmark parts.

4. 60

$30\% = 30/100$. $200 \times 30/100 = 60$. For example, 10% of 200 is 20; combine convenient benchmark parts.

5. 40

$20\% = 20/100$. $200 \times 20/100 = 40$. For example, 10% of 200 is 20; combine convenient benchmark parts.

6. 60

$30\% = 30/100$. $200 \times 30/100 = 60$. For example, 10% of 200 is 20; combine convenient benchmark parts.

Warm-up worked solutions

7. 60

$75\% = 75/100$. $80 \times 75/100 = 60$. For example, 10% of 80 is 8; combine convenient benchmark parts.

8. 40

$25\% = 25/100$. $160 \times 25/100 = 40$. For example, 10% of 160 is 16; combine convenient benchmark parts.

9. 20

$25\% = 25/100$. $80 \times 25/100 = 20$. For example, 10% of 80 is 8; combine convenient benchmark parts.

10. 120

$75\% = 75/100$. $160 \times 75/100 = 120$. For example, 10% of 160 is 16; combine convenient benchmark parts.

Classwork worked solutions

1. 9

$15\% = 15/100$. $60 \times 15/100 = 9$. For example, 10% of 60 is 6; combine convenient benchmark parts.

2. 16

$20\% = 20/100$. $80 \times 20/100 = 16$. For example, 10% of 80 is 8; combine convenient benchmark parts.

3. 8

$5\% = 5/100$. $160 \times 5/100 = 8$. For example, 10% of 160 is 16; combine convenient benchmark parts.

4. 2

$5\% = 5/100$. $40 \times 5/100 = 2$. For example, 10% of 40 is 4; combine convenient benchmark parts.

5. 50

$25\% = 25/100$. $200 \times 25/100 = 50$. For example, 10% of 200 is 20; combine convenient benchmark parts.

6. 30

$75\% = 75/100$. $40 \times 75/100 = 30$. For example, 10% of 40 is 4; combine convenient benchmark parts.

Exit-ticket worked solutions

1. 90

$75\% = 75/100$. $120 \times 75/100 = 90$. For example, 10% of 120 is 12; combine convenient benchmark parts.

2. 4

$5\% = 5/100$. $80 \times 5/100 = 4$. For example, 10% of 80 is 8; combine convenient benchmark parts.

3. 9

$15\% = 15/100$. $60 \times 15/100 = 9$. For example, 10% of 60 is 6; combine convenient benchmark parts.

4. 150

$75\% = 75/100$. $200 \times 75/100 = 150$. For example, 10% of 200 is 20; combine convenient benchmark parts.

Fall • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. Of 40 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

2. Of 40 supplies, 50% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

3. Of 200 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

4. Of 160 supplies, 25% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Fall • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. Of 120 supplies, 50% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

6. Of 160 supplies, 25% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

7. Of 120 supplies, 20% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

8. Of 200 supplies, 5% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Fall • Worked solutions

1. 8

$20\% = 20/100$. $40 \times 20/100 = 8$. For example, 10% of 40 is 4; combine convenient benchmark parts.

2. 20

$50\% = 50/100$. $40 \times 50/100 = 20$. For example, 10% of 40 is 4; combine convenient benchmark parts.

3. 40

$20\% = 20/100$. $200 \times 20/100 = 40$. For example, 10% of 200 is 20; combine convenient benchmark parts.

4. 40

$25\% = 25/100$. $160 \times 25/100 = 40$. For example, 10% of 160 is 16; combine convenient benchmark parts.

$75\% = 75/100$. $80 \times 75/100 = 60$. For example, 10% of 80 is 8; combine convenient benchmark parts.

8. 8

$20\% = 20/100$. $40 \times 20/100 = 8$. For example, 10% of 40 is 4; combine convenient benchmark parts.

Substitute lesson

Before students arrive

Locate the class schedule, seating plan, emergency procedures, and approved learner supports from the school. This academic packet does not replace those school-specific instructions.

0-5 minutes: settle

Read the goal aloud: Find parts using percent benchmarks. Let students explain a familiar strategy to a partner.

5-15 minutes: model

Use the worked-example page. Think of percent as parts per hundred. Build useful amounts from 10%, 25%, or 50%, then check against the whole.

15-30 minutes: practice

Distribute the next practice page. Students solve independently first, then compare one explanation in pairs. If copying is unavailable, read one question at a time and allow drawings or oral responses.

30-40 minutes: discuss

Use the following key. Ask students to locate the first step where methods diverged; invite a correction supported by a model.

40-45 minutes: handover

Collect one explanation from each student. On the planning page, record which step needs reteaching, who requested help, and what was completed. Use neutral observations, not diagnostic labels.

Substitute lesson • Practice

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. Of 120 supplies, 25% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

2. Of 200 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

3. Of 120 supplies, 50% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

4. Of 160 supplies, 75% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Substitute lesson • Worked solutions

1. 30

$25\% = 25/100$. $120 \times 25/100 = 30$. For example, 10% of 120 is 12; combine convenient benchmark parts.

2. 150

$75\% = 75/100$. $200 \times 75/100 = 150$. For example, 10% of 200 is 20; combine convenient benchmark parts.

3. 60

$50\% = 50/100$. $120 \times 50/100 = 60$. For example, 10% of 120 is 12; combine convenient benchmark parts.

4. 120

$75\% = 75/100$. $160 \times 75/100 = 120$. For example, 10% of 160 is 16; combine convenient benchmark parts.

Emergency substitute lesson

Before students arrive

Locate the class schedule, seating plan, emergency procedures, and approved learner supports from the school. This academic packet does not replace those school-specific instructions.

0-5 minutes: settle

Read the goal aloud: Find parts using percent benchmarks. Let students explain a familiar strategy to a partner.

5-15 minutes: model

No copies or devices? Write the first worked example on the board; students use blank paper. Think of percent as parts per hundred. Build useful amounts from 10%, 25%, or 50%, then check against the whole.

15-30 minutes: practice

Distribute the next practice page. Students solve independently first, then compare one explanation in pairs. If copying is unavailable, read one question at a time and allow drawings or oral responses.

30-40 minutes: discuss

Use the following key. Ask students to locate the first step where methods diverged; invite a correction supported by a model.

40-45 minutes: handover

Collect one explanation from each student. On the planning page, record which step needs reteaching, who requested help, and what was completed. Use neutral observations, not diagnostic labels.

Emergency substitute lesson • Practice

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. Of 200 supplies, 30% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

2. Of 160 supplies, 15% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

3. Of 120 supplies, 10% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

4. Of 200 supplies, 5% are set aside for a class project. How many are set aside? Show a benchmark-percent strategy.

Emergency substitute lesson • Worked solutions

1. 60

$30\% = 30/100$. $200 \times 30/100 = 60$. For example, 10% of 200 is 20; combine convenient benchmark parts.

2. 24

$15\% = 15/100$. $160 \times 15/100 = 24$. For example, 10% of 160 is 16; combine convenient benchmark parts.

3. 12

$10\% = 10/100$. $120 \times 10/100 = 12$. For example, 10% of 120 is 12; combine convenient benchmark parts.

4. 10

$5\% = 5/100$. $200 \times 5/100 = 10$. For example, 10% of 200 is 20; combine convenient benchmark parts.

A completed lesson-plan example

Level and focus

Grade 6; NC.6.RP.4; Find parts using percent benchmarks.

Evidence of learning

Student represents the quantities, selects a valid method, calculates accurately, and explains the result with appropriate units.

Launch / model

Use worked example 1. Ask students to annotate the role of every quantity. Demonstrate the model before moving to symbols.

Guided / independent practice

Use cards 1-4 in pairs; assign classwork independently. Change grouping according to the explanation you hear rather than speed alone.

Formative check

Use the four-question exit ticket. Score each item 0-2: 2 for an accurate result with coherent reasoning, 1 for a sound method with a minor error or an unexplained correct result, 0 for missing or unsupported reasoning.

Next teaching decision

0-3 points: reteach with a concrete model. 4-6: correct the specific misconception with a short example. 7-8: invite a second representation or a student-created problem. These are local instructional decisions, not mastery cutoffs validated by a test publisher.

Plan your next lesson

Date, class, and focus / exact local standard:

What will students do to show understanding?

Launch and worked example:

Guided practice and independent task:

Access supports and extension:

Exit evidence and next lesson decision:

Access, sources, and classroom license

AIG: Invite two methods, a counterexample, or a new task with a specified solution. Ask students to explain limits of a shortcut.

504: Apply the student's plan: breaks, extra time, enlarged print, reduced copying, or alternate response methods as documented.

EC: Use the IEP to select supports. Model one step, offer counters or a diagram, reduce the visible item set, and accept an oral explanation when appropriate.

ESL: Preview quantity, difference, factor, or other relevant terms. Let students rehearse in a home language, then use "I chose ___ because ___." Maintain the mathematical goal.
