

Signed Numbers, Real Changes Teaching Bundle

Grade 7 • North Carolina • Mathematics

NC.7.NS.1 • Interpret rational-number sums and differences.

A focused classroom collection: task cards, five warm-ups, classwork, an exit ticket, four seasonal practice sets, substitute lessons, and planning pages. Each section has worked answers.

PRINT • TEACH • REVISIT

Your teaching route

Focus

Interpret rational-number sums and differences. This bundle practices a focused part of NC.7.NS.1; it is not a complete grade curriculum or a simulated EOG.

Before teaching

Learners should explain a simpler example using a model. Read the two worked examples, then use the first task card to check readiness.

Suggested sequence

Day 1: model for 10 minutes, then guided task cards for 15 minutes. Day 2: a 5-minute warm-up and 20 minutes of practice. Use the exit ticket to choose a small-group reteaching focus. Seasonal sets revisit the same skill using different quantities.

Materials

Pencils, blank paper, and graph paper or counters as useful. No paid app or internet is needed for student work. A calculator may check finished calculations; these are instructional choices, not official testing accommodation rules.

Make the reasoning visible

Choose zero and a positive direction. Represent gains and losses with signs. Subtracting a negative reverses its direction.

Example 1: A game score starts at -9. It then decreases by 8 points. Find the new score. Represent the change on a number line.

$-9 + (-8) = -17$. Start at -9; move 8 units left.

Example 2: A game score starts at -9. It then increases by 2 points. Find the new score. Represent the change on a number line.

$-9 + (2) = -7$. Start at -9; move 2 units right.

Ask: What does each number represent? How could a model or inverse operation check the result?

Task cards 1-4

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 01

A game score starts at -5. It then decreases by 2 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 02

A game score starts at -5. It then increases by 3 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 03

A game score starts at -6. It then decreases by 8 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 04

A game score starts at -7. It then increases by 8 points. Find the new score. Represent the change on a number line.

Explain your method.

Task cards 5–8

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 05

A game score starts at -8 . It then decreases by 5 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 06

A game score starts at -9 . It then increases by 4 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 07

A game score starts at -9 . It then decreases by 5 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 08

A game score starts at -4 . It then increases by 7 points. Find the new score. Represent the change on a number line.

Explain your method.

Task cards 9–12

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 09

A game score starts at -5 . It then decreases by 4 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 10

A game score starts at -8 . It then increases by 5 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 11

A game score starts at -3 . It then decreases by 7 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 12

A game score starts at -7 . It then increases by 4 points. Find the new score. Represent the change on a number line.

Explain your method.

Task cards 13–16

Read, represent, solve, and explain. Record full reasoning on the response page or separate paper.

CARD 13

A game score starts at -6 . It then decreases by 2 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 14

A game score starts at -7 . It then increases by 3 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 15

A game score starts at -8 . It then decreases by 3 points. Find the new score. Represent the change on a number line.

Explain your method.

CARD 16

A game score starts at -7 . It then increases by 8 points. Find the new score. Represent the change on a number line.

Explain your method.

Warm-up • Day 1

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

1. A game score starts at -2 . It then decreases by 5 points. Find the new score. Represent the change on a number line.

2. A game score starts at -7 . It then increases by 3 points. Find the new score. Represent the change on a number line.

Warm-up • Day 2

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

3. A game score starts at -5 . It then decreases by 6 points. Find the new score. Represent the change on a number line.

4. A game score starts at -8 . It then increases by 6 points. Find the new score. Represent the change on a number line.

Warm-up • Day 3

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

5. A game score starts at -6 . It then decreases by 2 points. Find the new score. Represent the change on a number line.

6. A game score starts at -4 . It then increases by 5 points. Find the new score. Represent the change on a number line.

Warm-up • Day 4

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

7. A game score starts at -3 . It then decreases by 7 points. Find the new score. Represent the change on a number line.

8. A game score starts at -7 . It then increases by 6 points. Find the new score. Represent the change on a number line.

Warm-up • Day 5

Work for about five minutes. Compare one method with a partner. Complete unfinished reasoning during review.

9. A game score starts at -2 . It then decreases by 5 points. Find the new score. Represent the change on a number line.

10. A game score starts at -3 . It then increases by 2 points. Find the new score. Represent the change on a number line.

Classwork • Represent and explain

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. A game score starts at -8. It then decreases by 4 points. Find the new score. Represent the change on a number line.

2. A game score starts at -9. It then increases by 3 points. Find the new score. Represent the change on a number line.

3. A game score starts at -6. It then decreases by 7 points. Find the new score. Represent the change on a number line.

Classwork • Represent and explain

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

4. A game score starts at -7 . It then increases by 6 points. Find the new score. Represent the change on a number line.

5. A game score starts at -6 . It then decreases by 6 points. Find the new score. Represent the change on a number line.

6. A game score starts at -5 . It then increases by 8 points. Find the new score. Represent the change on a number line.

Exit ticket • Try independently

Complete the four questions independently. Show enough reasoning for your teacher to see your method. This is a classroom check, not a standardized score.

1. A game score starts at -4 . It then decreases by 2 points. Find the new score. Represent the change on a number line.

2. A game score starts at -8 . It then increases by 5 points. Find the new score. Represent the change on a number line.

3. A game score starts at -6 . It then decreases by 5 points. Find the new score. Represent the change on a number line.

4. A game score starts at -6 . It then increases by 7 points. Find the new score. Represent the change on a number line.

Task-card worked solutions

1. -7

$-5 + (-2) = -7$. Start at -5; move 2 units left.

2. -2

$-5 + (3) = -2$. Start at -5; move 3 units right.

3. -14

$-6 + (-8) = -14$. Start at -6; move 8 units left.

4. 1

$-7 + (8) = 1$. Start at -7; move 8 units right.

5. -13

$-8 + (-5) = -13$. Start at -8; move 5 units left.

6. -5

$-9 + (4) = -5$. Start at -9; move 4 units right.

Task-card worked solutions

7. -14

$-9 + (-5) = -14$. Start at -9; move 5 units left.

8. 3

$-4 + (7) = 3$. Start at -4; move 7 units right.

9. -9

$-5 + (-4) = -9$. Start at -5; move 4 units left.

10. -3

$-8 + (5) = -3$. Start at -8; move 5 units right.

11. -10

$-3 + (-7) = -10$. Start at -3; move 7 units left.

12. -3

$-7 + (4) = -3$. Start at -7; move 4 units right.

Task-card worked solutions

13. -8

$-6 + (-2) = -8$. Start at -6; move 2 units left.

14. -4

$-7 + (3) = -4$. Start at -7; move 3 units right.

15. -11

$-8 + (-3) = -11$. Start at -8; move 3 units left.

16. 1

$-7 + (8) = 1$. Start at -7; move 8 units right.

Warm-up worked solutions

1. -7

$-2 + (-5) = -7$. Start at -2; move 5 units left.

2. -4

$-7 + (3) = -4$. Start at -7; move 3 units right.

3. -11

$-5 + (-6) = -11$. Start at -5; move 6 units left.

4. -2

$-8 + (6) = -2$. Start at -8; move 6 units right.

5. -8

$-6 + (-2) = -8$. Start at -6; move 2 units left.

6. 1

$-4 + (5) = 1$. Start at -4; move 5 units right.

Warm-up worked solutions

7. -10

$-3 + (-7) = -10$. Start at -3; move 7 units left.

8. -1

$-7 + (6) = -1$. Start at -7; move 6 units right.

9. -7

$-2 + (-5) = -7$. Start at -2; move 5 units left.

10. -1

$-3 + (2) = -1$. Start at -3; move 2 units right.

Classwork worked solutions

1. -12

$-8 + (-4) = -12$. Start at -8; move 4 units left.

2. -6

$-9 + (3) = -6$. Start at -9; move 3 units right.

3. -13

$-6 + (-7) = -13$. Start at -6; move 7 units left.

4. -1

$-7 + (6) = -1$. Start at -7; move 6 units right.

5. -12

$-6 + (-6) = -12$. Start at -6; move 6 units left.

6. 3

$-5 + (8) = 3$. Start at -5; move 8 units right.

Exit-ticket worked solutions

1. -6

$-4 + (-2) = -6$. Start at -4; move 2 units left.

2. -3

$-8 + (5) = -3$. Start at -8; move 5 units right.

3. -11

$-6 + (-5) = -11$. Start at -6; move 5 units left.

4. 1

$-6 + (7) = 1$. Start at -6; move 7 units right.

Fall • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A game score starts at -4 . It then decreases by 4 points. Find the new score. Represent the change on a number line.

2. A game score starts at -8 . It then increases by 3 points. Find the new score. Represent the change on a number line.

3. A game score starts at -8 . It then decreases by 6 points. Find the new score. Represent the change on a number line.

4. A game score starts at -3 . It then increases by 8 points. Find the new score. Represent the change on a number line.

Fall • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A game score starts at -9 . It then decreases by 4 points. Find the new score. Represent the change on a number line.

6. A game score starts at -4 . It then increases by 3 points. Find the new score. Represent the change on a number line.

7. A game score starts at -4 . It then decreases by 4 points. Find the new score. Represent the change on a number line.

8. A game score starts at -3 . It then increases by 2 points. Find the new score. Represent the change on a number line.

Fall • Worked solutions

1. -8

$-4 + (-4) = -8$. Start at -4; move 4 units left.

2. -5

$-8 + (3) = -5$. Start at -8; move 3 units right.

3. -14

$-8 + (-6) = -14$. Start at -8; move 6 units left.

4. 5

$-3 + (8) = 5$. Start at -3; move 8 units right.

Fall • Worked solutions

5. -13

$-9 + (-4) = -13$. Start at -9; move 4 units left.

6. -1

$-4 + (3) = -1$. Start at -4; move 3 units right.

7. -8

$-4 + (-4) = -8$. Start at -4; move 4 units left.

8. -1

$-3 + (2) = -1$. Start at -3; move 2 units right.

Winter • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A game score starts at -8 . It then decreases by 7 points. Find the new score. Represent the change on a number line.

2. A game score starts at -2 . It then increases by 4 points. Find the new score. Represent the change on a number line.

3. A game score starts at -8 . It then decreases by 6 points. Find the new score. Represent the change on a number line.

4. A game score starts at -6 . It then increases by 2 points. Find the new score. Represent the change on a number line.

Winter • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A game score starts at -3 . It then decreases by 6 points. Find the new score. Represent the change on a number line.

6. A game score starts at -4 . It then increases by 2 points. Find the new score. Represent the change on a number line.

7. A game score starts at -6 . It then decreases by 5 points. Find the new score. Represent the change on a number line.

8. A game score starts at -9 . It then increases by 8 points. Find the new score. Represent the change on a number line.

Winter • Worked solutions

1. -15

$-8 + (-7) = -15$. Start at -8; move 7 units left.

2. 2

$-2 + (4) = 2$. Start at -2; move 4 units right.

3. -14

$-8 + (-6) = -14$. Start at -8; move 6 units left.

4. -4

$-6 + (2) = -4$. Start at -6; move 2 units right.

Winter • Worked solutions

5. -9

$-3 + (-6) = -9$. Start at -3; move 6 units left.

6. -2

$-4 + (2) = -2$. Start at -4; move 2 units right.

7. -11

$-6 + (-5) = -11$. Start at -6; move 5 units left.

8. -1

$-9 + (8) = -1$. Start at -9; move 8 units right.

Spring break • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A game score starts at -7 . It then decreases by 7 points. Find the new score. Represent the change on a number line.

2. A game score starts at -8 . It then increases by 5 points. Find the new score. Represent the change on a number line.

3. A game score starts at -4 . It then decreases by 2 points. Find the new score. Represent the change on a number line.

4. A game score starts at -8 . It then increases by 2 points. Find the new score. Represent the change on a number line.

Spring break • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A game score starts at -4 . It then decreases by 5 points. Find the new score. Represent the change on a number line.

6. A game score starts at -7 . It then increases by 4 points. Find the new score. Represent the change on a number line.

7. A game score starts at -9 . It then decreases by 3 points. Find the new score. Represent the change on a number line.

8. A game score starts at -2 . It then increases by 8 points. Find the new score. Represent the change on a number line.

Spring break • Worked solutions

1. -14

$-7 + (-7) = -14$. Start at -7; move 7 units left.

2. -3

$-8 + (5) = -3$. Start at -8; move 5 units right.

3. -6

$-4 + (-2) = -6$. Start at -4; move 2 units left.

4. -6

$-8 + (2) = -6$. Start at -8; move 2 units right.

Spring break • Worked solutions

5. -9

$-4 + (-5) = -9$. Start at -4; move 5 units left.

6. -3

$-7 + (4) = -3$. Start at -7; move 4 units right.

7. -12

$-9 + (-3) = -12$. Start at -9; move 3 units left.

8. 6

$-2 + (8) = 6$. Start at -2; move 8 units right.

Summer • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

1. A game score starts at -2 . It then decreases by 2 points. Find the new score. Represent the change on a number line.

2. A game score starts at -6 . It then increases by 6 points. Find the new score. Represent the change on a number line.

3. A game score starts at -6 . It then decreases by 6 points. Find the new score. Represent the change on a number line.

4. A game score starts at -2 . It then increases by 4 points. Find the new score. Represent the change on a number line.

Summer • Skill revisit

Complete four questions per sitting, about 15–20 minutes. Review the worked examples if needed. Explain one answer to a classmate or adult.

5. A game score starts at -5 . It then decreases by 6 points. Find the new score. Represent the change on a number line.

6. A game score starts at -9 . It then increases by 6 points. Find the new score. Represent the change on a number line.

7. A game score starts at -8 . It then decreases by 4 points. Find the new score. Represent the change on a number line.

8. A game score starts at -2 . It then increases by 7 points. Find the new score. Represent the change on a number line.

Summer • Worked solutions

1. -4

$-2 + (-2) = -4$. Start at -2; move 2 units left.

2. 0

$-6 + (6) = 0$. Start at -6; move 6 units right.

3. -12

$-6 + (-6) = -12$. Start at -6; move 6 units left.

4. 2

$-2 + (4) = 2$. Start at -2; move 4 units right.

Summer • Worked solutions

5. -11

$-5 + (-6) = -11$. Start at -5; move 6 units left.

6. -3

$-9 + (6) = -3$. Start at -9; move 6 units right.

7. -12

$-8 + (-4) = -12$. Start at -8; move 4 units left.

8. 5

$-2 + (7) = 5$. Start at -2; move 7 units right.

Substitute lesson

Before students arrive

Locate the class schedule, seating plan, emergency procedures, and approved learner supports from the school. This academic packet does not replace those school-specific instructions.

0-5 minutes: settle

Read the goal aloud: Interpret rational-number sums and differences. Let students explain a familiar strategy to a partner.

5-15 minutes: model

Use the worked-example page. Choose zero and a positive direction. Represent gains and losses with signs. Subtracting a negative reverses its direction.

15-30 minutes: practice

Distribute the next practice page. Students solve independently first, then compare one explanation in pairs. If copying is unavailable, read one question at a time and allow drawings or oral responses.

30-40 minutes: discuss

Use the following key. Ask students to locate the first step where methods diverged; invite a correction supported by a model.

40-45 minutes: handover

Collect one explanation from each student. On the planning page, record which step needs reteaching, who requested help, and what was completed. Use neutral observations, not diagnostic labels.

Substitute lesson • Practice

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. A game score starts at -3 . It then decreases by 3 points. Find the new score. Represent the change on a number line.

2. A game score starts at -4 . It then increases by 7 points. Find the new score. Represent the change on a number line.

3. A game score starts at -6 . It then decreases by 2 points. Find the new score. Represent the change on a number line.

4. A game score starts at -2 . It then increases by 2 points. Find the new score. Represent the change on a number line.

Substitute lesson • Worked solutions

1. -6

$-3 + (-3) = -6$. Start at -3; move 3 units left.

2. 3

$-4 + (7) = 3$. Start at -4; move 7 units right.

3. -8

$-6 + (-2) = -8$. Start at -6; move 2 units left.

4. 0

$-2 + (2) = 0$. Start at -2; move 2 units right.

Emergency substitute lesson

Before students arrive

Locate the class schedule, seating plan, emergency procedures, and approved learner supports from the school. This academic packet does not replace those school-specific instructions.

0-5 minutes: settle

Read the goal aloud: Interpret rational-number sums and differences. Let students explain a familiar strategy to a partner.

5-15 minutes: model

No copies or devices? Write the first worked example on the board; students use blank paper. Choose zero and a positive direction. Represent gains and losses with signs. Subtracting a negative reverses its direction.

15-30 minutes: practice

Distribute the next practice page. Students solve independently first, then compare one explanation in pairs. If copying is unavailable, read one question at a time and allow drawings or oral responses.

30-40 minutes: discuss

Use the following key. Ask students to locate the first step where methods diverged; invite a correction supported by a model.

40-45 minutes: handover

Collect one explanation from each student. On the planning page, record which step needs reteaching, who requested help, and what was completed. Use neutral observations, not diagnostic labels.

Emergency substitute lesson • Practice

Show your thinking with a drawing, equation, or explanation. Use the space under each question.

1. A game score starts at -2 . It then decreases by 2 points. Find the new score. Represent the change on a number line.

2. A game score starts at -9 . It then increases by 7 points. Find the new score. Represent the change on a number line.

3. A game score starts at -6 . It then decreases by 4 points. Find the new score. Represent the change on a number line.

4. A game score starts at -3 . It then increases by 5 points. Find the new score. Represent the change on a number line.

Emergency substitute lesson • Worked solutions

1. -4

$-2 + (-2) = -4$. Start at -2; move 2 units left.

2. -2

$-9 + (7) = -2$. Start at -9; move 7 units right.

3. -10

$-6 + (-4) = -10$. Start at -6; move 4 units left.

4. 2

$-3 + (5) = 2$. Start at -3; move 5 units right.

A completed lesson-plan example

Level and focus

Grade 7; NC.7.NS.1; Interpret rational-number sums and differences.

Evidence of learning

Student represents the quantities, selects a valid method, calculates accurately, and explains the result with appropriate units.

Launch / model

Use worked example 1. Ask students to annotate the role of every quantity. Demonstrate the model before moving to symbols.

Guided / independent practice

Use cards 1-4 in pairs; assign classwork independently. Change grouping according to the explanation you hear rather than speed alone.

Formative check

Use the four-question exit ticket. Score each item 0-2: 2 for an accurate result with coherent reasoning, 1 for a sound method with a minor error or an unexplained correct result, 0 for missing or unsupported reasoning.

Next teaching decision

0-3 points: reteach with a concrete model. 4-6: correct the specific misconception with a short example. 7-8: invite a second representation or a student-created problem. These are local instructional decisions, not mastery cutoffs validated by a test publisher.

Plan your next lesson

Date, class, and focus / exact local standard:

What will students do to show understanding?

Launch and worked example:

Guided practice and independent task:

Access supports and extension:

Exit evidence and next lesson decision:

Access, sources, and classroom license

AIG: Invite two methods, a counterexample, or a new task with a specified solution. Ask students to explain limits of a shortcut.

504: Apply the student's plan: breaks, extra time, enlarged print, reduced copying, or alternate response methods as documented.

EC: Use the IEP to select supports. Model one step, offer counters or a diagram, reduce the visible item set, and accept an oral explanation when appropriate.

ESL: Preview quantity, difference, factor, or other relevant terms. Let students rehearse in a home language, then use "I chose ___ because ___." Maintain the mathematical goal.
